Cincinnati, OH | joseasjn@mail.uc.edu | (513)-908-1092

LinkedIn

EDUCATION

University of Cincinnati — B.S. in Computer Science | Minor in Statistics

Expected Graduation: May 2028

- **Dean's List:** Fall 2024, Spring 2025, Summer 2025, Fall 2025

GPA: 3.79/4.00

- **Primary Coursework:** CS 5071 – Deep Learning | STAT 4041 – Bayesian Data Science

SKILLS

Web Development/Databases: HTML, CSS, PostgreSQL

Networking Tools: Packet Tracer, Wireshark

Software: Microsoft Services, VBA, LabVIEW, MATLAB, AWS, Jupyter

Libraries/Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Folium, SciPy, Scikit-learn, TensorFlow, PyTorch

Programming Languages: Python, Java, R, JavaScript, C++, C#, SQL, Scala

EXPERIENCE

Knorr-Bremse – Bendix Commercial Vehicle Systems LLC (Avon, OH)

January 2026 – August 2026

Advanced Manufacturing Engineering Intern

- Integrated PLC and manufacturing equipment data through Ignition to support predictive analytics, anomaly detection, and machine performance monitoring.
- Applied data analytics to identify production bottlenecks and improve manufacturing efficiency using computer vision technology.
- Developed dashboards and automated reporting solutions using Microsoft Power Apps, Power BI, and Power Automate.
- Built and supported development of AI-powered chatbot agents using NLP concepts for issue summarization, status tracking, and decision support.
- Collaborated with cross-functional engineering teams to support AI-driven automation and process improvement initiatives.
- Contributed to centralized, database-backed applications for operational visibility and workflow automation.
- Built technical experience in AI, data analytics, industrial automation, and manufacturing systems engineering.

Engineering Design Thinking II – University of Cincinnati (Cincinnati, OH)

August 2025 – December 2025

Teacher Assistant

- Assisted students during in-class activities and tutoring sessions to support learning and engagement.
- Facilitated peer mentoring sessions and provided individualized academic support.
- Collaborated with a team of TAs to grade assignments, exams, and projects.
- Participated in weekly training and orientation to ensure effective instruction and student support.

GITHUB PROJECTS

Convolutional Neural Networks

October 2025

- Built and compared Logistic Regression, DNN, CNN, VGG-like, and ResNet models on 70,000 MNIST images, using Adam optimizer, EarlyStopping, and Dropout to boost convergence, with the custom ResNet achieving the best performance (F1 = 0.9938, AUC = 0.99995).

Linear Regression & Deep Neural Networks

September 2025

- Compared Linear Regression vs. multi-layer DNNs (ReLU, dropout, batch normalization) to predict cancer mortality rates from 3,047 samples/30 features, with the best DNN-30-8 model ($R^2 = 0.8703$, MSE = 103.0) outperforming the Linear Regression baseline ($R^2 = 0.7902$).

Exploratory Data Analysis & ML Classification Models

July 2025

- Performed EDA and feature engineering on an academic performance dataset, then built and tuned Random Forest, XGBoost, SVM, and Logistic Regression models via GridSearchCV/5-fold CV (97% accuracy) and used SHAP values to identify top predictors like test prep and parental education.

CERTIFICATIONS

Amazon — AWS Certified ML Engineer (July 2025)

IBM — Data Science with Scala (July 2025)

IBM — Deep Learning using TensorFlow (June 2025)

IBM — Data Science Professional Certificate (June 2025)

Amazon — AWS Certified AI Practitioner (June 2025)

Amazon — AWS Certified Cloud Practitioner (May 2025)

IBM — Data Visualization with Python (May 2025)

IBM — Data Visualization with R (May 2025)
